EDUCATION

K S RANGASAMY COLLEGE OF ARTS & SCIENCE

BACHELOR OF COMPUTER APPLICATIONS (BCA)
2020 - 2023 | CGPA: 7.63 / 10.0

GOVT. HR. SEC. SCHOOL

COMPUTER SCIENCE
2019 - 2020 | Percentage: 84.89%

SKILLS

PROGRAMMING

Java, JavaScript, HTML, CSS, SQL

FRAMEWORKS/LIBRARIES

React.js, Spring Boot, Node.js, Tailwind, Bootstrap

TOOLS & PLATFORMS

Eclipse, IntelliJ IDEA, Kognic, GT Studio, Git, GitHub,

DEVELOPMENT PRACTICES

SDLC, Oops, Input Validation
Exception Handling, Git-Based
Collaboration

AWARDS

July 2024
R&R Recognition Nominee
Rprocess - Maps Project.

March 2025
Matsya Yantra Award
Awarded for contributions to the
Rprocess.

COURSEWORK

GRADUATE

Data Structures & Algorithms
Software Development Life Cycle
Object Oriented Programming
Operating Systems
Artificial Intelligence
Database Management System
(Research Asst. & Leadership Asst. 2x)

EXPERIENCE

LETNEXT TECHNOLOGIES | SOFTWARE ENGINEERING INTERN

Oct 2025 - Jan 2026 | Erode, Tamil Nadu

- Owned 3 product workstreams, bridging frontend and backend development to translate business requirements into production-ready application features.
- Engineered FinTrack's transactional backend with REST APIs for 4 core operations — create, retrieve, update, and delete — reducing transaction creation latency by 25%.
- Architected a responsive React.js financial dashboard with transaction controls, financial summaries, and interactive charts, improving initial page load time by 30% through state optimization and lazy loading.
- Extended FinTrack beyond the browser by packaging the application as both a PWA and Android app using Capacitor, enabling cross-platform delivery from a shared codebase.

DESICREW SOLUTION PVT., LTD., | 3D & 2D DATA ANNOTATIONS SPECIALIST

April 2024 - Sept 2025 | Erode, Tamil Nadu

- Annotated 20,000+ images and videos for machine-learning models involving object detection, segmentation, and classification.
- Achieved 98% annotation accuracy with industry-standard platforms including Kognic, CVAT, and GT Studio.
- Performed quality-assurance checks across 5+ major client datasets, maintaining consistency and adherence to project guidelines.
- Optimized data-labeling workflows and methodologies, increasing overall annotation efficiency by 30%.
- Executed 2D image/video labeling through bounding boxes, polygons, polylines, and keypoints, delivering precise object localization for high-quality training datasets.

PROJECTS

YOUTUBE RAG CHAT SYSTEM | Link | PYTHON | OPENAI API | RAG | YOUTUBE API

- Built a YouTube-based AI question-answering system capable of processing 50+ videos and answering questions using their transcript content.
- Architected a 3-stage RAG workflow combining dynamic chunking and semantic search, reducing LLM token consumption by 28% and improving query responsiveness by 180ms.
- Integrated the OpenAI API to convert retrieved transcript content into clear, context-aware answers for user queries.
- Evaluated the system with 100+ test queries, achieving a 23.5% improvement in retrieval relevance through semantic search and optimized chunking.
